Occurrence	Location / Period
BDA	University of Bradford / Semester 1 (Sep - Jan)

Module Aims
To enable you to understand a range of mental health issues affecting people across the life span including children and young people, people of working age and older adults and to recognise the impact of culture, ethnicity, gender, sexuality on mental health; to understand different models of mental health and the range of professionals and services that may be involved in offering support; to be aware of the relevant policy & legislative frameworks; to contribute to assessment, planning and intervention in work with people who have mental health needs, including situations involving risk; to work to promote wellbeing and recovery; to be able to promote the rights of service users and to challenge oppression and discrimination Outline Syllabus: Mental Health through the lifespan; policies, & legislation; social and medical models; recovery; service user & carer perspectives; rights; community care; assessment & care planning; managing risk; multidisciplinary, interagency and multiagency working; user

involvement and participation including user-led services; impact of culture, race, gender, sexuality & social class; mental health & substance / alcohol use; adult mental health & child welfare; mental health of children & young people.

Outline Syllabus

Learning Outcomes

1	Demonstrate a critical and comprehensive understanding of key theoretical approaches, relevant legislation and policy that underpin effective mental health work;
2	Demonstrate a critical understanding of the contribution of social work and social care services to mental health;
3	Critically analyse the contribution of economic, political, cultural and issues to mental health, and the impact of stigma and discrimination on people experiencing mental health difficulties.
4	Demonstrate a critical understanding of the common principles and nuanced appreciation that underpin mental health care planning across the life course
5	Critically assess human situations, taking into account a variety of factors (including the views of service users, theoretical concepts, research evidence, legislation and organisational policies and procedures);
6	Demonstrate advanced knowledge and understanding of specific factors relevant to social work and social care practice (such as risk, rights, cultural difference and linguistic sensitivities, responsibilities to protect vulnerable individuals and legal obligations).

Learning, Teaching and Assessment Strategy

Lectures, seminars, group work and case discussions, guest speakers.
You will be assessed by an essay and a group presentation.

Mode of Assessment

Type	Method	Description	Length	Weighting
Summative	Presentation	group or individual presentation	10 minutes	30%
Summative	Coursework	Essay	2500 words	70%

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
