

Module Details	
Module Title	Econometrics
Module Code	AFE6019-B
Academic Year	2020/1
Credits	20
School	School of Management
Subject Area	Accounting, Finance and Economics
FHEQ Level	FHEQ Level 6
Pre-requisites	AFE5023-B, ID-4119L
Co-requisites	N/A

Contact Hours	
Type	Hours
Lectures	24
Tutorials	12
Directed Study	164

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Semester 1

Module Aims
The module aims to equip you with the core knowledge of the econometric theory, statistical modelling and estimation techniques in modern economics.

Outline Syllabus
N/A

Learning Outcomes	
Outcome Number	Description
01	1a. Form research question / hypotheses. 1b. Select appropriate evaluation methods relevant to economic and social issues.
02	2a. Perform econometric analysis on data sets and analyse the implications. 2b. Use econometric packages to estimate appropriate models and perform diagnostic tests on the results
03	3a. Access, manage and process data. 3 3b. Report on data analysis.

Learning, Teaching and Assessment Strategy
This module builds on prior level of undergraduate statistics/econometrics study with weekly online lectures introducing students to curriculum topics. Both online and face-to-face Computer lab sessions will address these topics using suitable data sets. At the end of the module each student will submit an individual project of research on a broadly specified topic. A short interim individual report on the student`s personal data analysis will be provided feedback to support the final submission. The range and volume of assessment is justified by the quantitative nature of the subject. This module will draw on applications from applied economics in order to demonstrate methodological issues and the application of various statistical techniques to provide students with the knowledge base to interpret the research literature underpinning the successful completion of their dissertation.

Mode of Assessment				
Type	Method	Description	Length	Weighting
Summative	Coursework	Individual data analysis report of up to 2000 words	N/A	40%
Summative	Coursework	Individual Project of up to 3000 words	N/A	60%

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
