Module Aims
To start the practical aspects of the research project. To become familiar with the experimental techniques required and optimise the experimental conditions and protocols necessary for a longer study. To develop an appreciation of the detailed requirements of the proposed project, and its time management, planning the different stages of the experimental work with a projected list of proposed outcomes.

Outline Syllabus
As described in the Research Project descriptor and agreed with the main project supervisor.

Learning Outcomes	
Outcome Number	Description
1	Critically evaluate and communicate scientific data in the context of published work
2	Demonstrate critical thinking
3	Demonstrate an understanding of research and scientific method
4	Undertake project planning and time management, agree objectives, responsibilities and working arrangements
5	Work with a supervisor and technical staff to plan, agree objectives, responsibilities and working arrangements; explore problems and compare and select options to overcome them
6	Demonstrate effective time management

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
