Learning Outcomes	
Outcome Number	Description
01	On successful completion of this module, students will be able to... LO1Evaluate legal institutions, rules, principles, and underlying legal concepts in relation to the law of evidence
02	Evaluate complex evidence problems and provide solutions to these deploying systematic legal analysis and, where appropriate, ethical awareness.
03	Conduct independent legal research, drawing on an appropriate range of sources to retrieve and evaluate relevant information and commentary, and to critically apply their findings.
04	Show awareness of the economic and social contexts in which the law of evidence operates and of the professional competencies required in practice.
05	Demonstrate deep, contextualised understanding of substantive areas of the law of evidence and grasp of current academic debates and of relevant doctrinal and policy issues.

Learning, Teaching and Assessment Strategy
This module covers the law of evidence in a variety of contexts and introduces you to the key issues and debates in this area of law. Through lectures and seminars you will explore the law and discuss and debate issues arising from its application. Lectures will deliver core content; providing students with the opportunity to acquire the information to enhance their knowledge and understanding of key issues. This groundwork will be complemented by tutorials, each of which will be based on a key contemporary issue in company law. The tutorials will provide a forum to analyse these issues, employing group work and case studies by students. Active participation by all students is required in all tutorials and, where appropriate lectures, in order to engage with the module. During tutorials, verbal feedback will be provided to students regarding their work and there will be an opportunity to submit formative written work for feedback prior to the summative coursework that tests all five learning outcomes.
