

Module Details	
Module Title	Large Scale Data Driven Applications
Module Code	COS6009-B
Academic Year	2021/2
Credits	20
School	Department of Computer Science
FHEQ Level	FHEQ Level 6

Contact Hours	
Type	Hours
Lectures	24
Tutorials	12
Laboratories	12
Directed Study	152

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Semester 1

Module Aims
To develop an understanding of the theory and practice of large-scale data driven applications.

Outline Syllabus
Study of developments in data models subsequent to the relational model. Study of developments in features supported by DBMSs. Study of database design for systems with advanced features. Study of issues related to big data. Service oriented architectures, orchestration of services, and support technologies.

Learning Outcomes	
Outcome Number	Description
01	demonstrate a knowledge and understanding of the theory and practice of large-scale data driven applications.
02	apply skills in the design, and implementation of large-scale data driven applications
03	demonstrate competence is applying theoretical skills to practical problems.

Learning, Teaching and Assessment Strategy
A combination of lectures/tutorials/lab sessions/directed study. Concepts, principles & theories explored in formal lectures, practised & demonstrated in laboratory classes and practised and discussed in tutorials. Practical skills developed in laboratory sessions. Oral feedback is given during labs & tutorials. Coursework will assess the application of practical skills to the knowledge base of the module, the examination will assess the wider learning outcomes expressed in the descriptor. Supplementary coursework will involve repairing deficiencies in the original submission.

Mode of Assessment			
Type	Method	Description	Weighting
Summative	Coursework	Design and critical analysis of a web-based application for providing a range of functions on a large dataset	50%
Summative	Coursework	Implementation of the design produced in component 001	50%

Reading List

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
