

Module Details	
Module Title	Placement module
Module Code	ENG5002-Z
Academic Year	2021/2
Credits	N/A
School	Department of Computer Science
FHEQ Level	FHEQ Level 5

Contact Hours	
Type	Hours
Directed Study	1200

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Full Year

Module Aims
To provide you with an opportunity to apply the knowledge, understanding and skills gained on your course in an organisational setting. To help you develop autonomy and initiative, and work effectively as a member of a professional team. To help you gain experience of the working environment and assess career opportunities available on graduation.

Outline Syllabus
Placements are made available by voluntary co-operation of companies and other organisations with the Faculty of Engineering & Informatics. Students spend a minimum 36 weeks working in an organisation(s) (often students are employed for 12 months or more). Students undertaking a Placement will be provided with academic supervision and administrative support and advice appropriate to their course. This is done under the direction of your workplace supervisor, and support is provided by your academic Placement Tutor under the overall management of the Placement Module Tutors of the Faculty of Engineering & Informatics and the University Placement Office.

Learning Outcomes	
Outcome Number	Description
01	Demonstrate the ability to both absorb fresh technical information and apply your knowledge to solving technological problems in a workplace environment both autonomously and as part of a team; Demonstrate an appreciation of the need for, and ways of achieving good communication and personal relationships with people in a work team and at all levels within the organisation.
02	Demonstrate skills in reflecting on how your previous academic education, skills and abilities apply in a practical context in an organisation, and how your experience gained on Placement impacts on your future career plans.
03	Demonstrate professional skills necessary in the workplace including self-motivation, initiative, problem-solving, negotiation, verbal and written communication, leadership, time management, prioritisation of tasks and meeting deadlines.

Learning, Teaching and Assessment Strategy
Your placement work is directed by your workplace supervisor but the academic placement tutors will also be in regular contact with you during your placement year. For UK-based Placements your academic placement tutor will either visit your place of work twice during the year or hold online video conference meetings. A first visit/meeting will check that integration into the workplace is proceeding and a second visit will assess your progress. Feedback will be sought from your employer and this will be used to generate a Placement Visit Report. Overseas placements may also use video-conferencing instead of face to face meetings. Your performance during this placement will be evidenced by a Monthly Logbook (that you complete) an Interim Placement Report, a Final Report and an Oral Presentation in front of peers. If Covid-19 restrictions do not permit face-to-face oral presentations these will be assessed online. Supplementary assessment is a repeat of the failed element with the exception of the placement visit report.

Mode of Assessment			
Type	Method	Description	Weighting
Summative	Coursework	Interim Placement Report including reflection (1500 words)	20%
Summative	Presentation	Presentation highlighting company overview, roles, tasks, reflection and advice for students considering placement-15min	20%
Summative	Coursework	Placement visit reports from industrial supervisor, moderated by Placement visit reports from industrial supervisor, mod	20%
Summative	Coursework	Final placement report expanding on interim report, including reflection (3000 words)	40%

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
